

PRODUCT FOCUS

P-Series Heavy Industrial Planetary Gearmotors

OVERVIEW

SEW-Eurodrive's P-Series combination planetary gearmotor offers high power density in the high power range. Inline co-axial and right angle configurations add design flexibility.

PRODUCT RANGE

- Helical and bevel-helical
- Ratios from 100:1 to 4200:1
- Torque capacities to 4,000,000 lb-in. and input capacities to 180 HP

STANDARD FEATURES

- Manufactured in plants certified ISO 9001:2000
- International product support available through technical sales offices worldwide
- Case hardened, spur steel gears are finished to AGMA 12 (ISO 6, DIN 6)
- High capacity anti-friction bearings selected for extended life and trouble-free service
- Gray cast iron housings; splash and pressure lube; modular construction
- Fast delivery

Mounting Configurations

- Multiple mounting options including co-axial, right angle, foot mounted and flange mounted
- Horizontal or vertical mounting
- Solid shaft or shrink disc, torque arm
- C-face and V-belt motor mounts
- Output mounting flanges

OPTIONAL FEATURES

- Backstops, base plates, coupling guards
- Complete power transmission packages including motors, AC drives, reducers, base plates, and couplings
- Easy adaptation of application-driven modifications to the standard reducer design
- Multiple seal arrangements

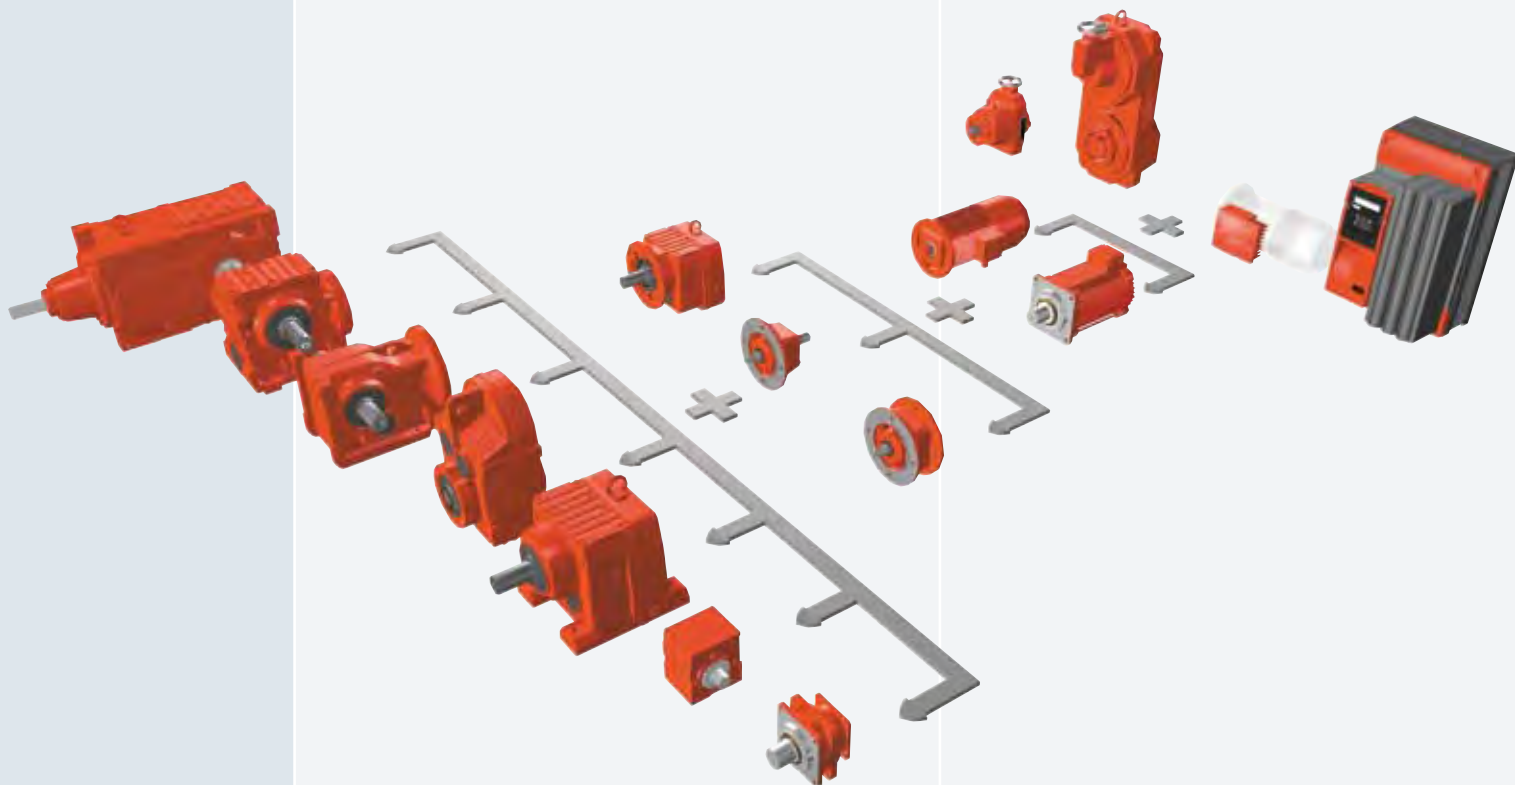

SEW-EURODRIVE
Driving the World

SEW EURODRIVE

PRODUCT FOCUS

For more than 50 years, SEW-Eurodrive has been industry's global supplier of choice for innovative, reliable gearing and high-performance motors. We are also one of the world's leading suppliers of electronic drives. Wherever things need to be moved – that's where you'll find SEW-Eurodrive.

SEW gear units are legendary for their outstanding performance and uncompromising quality, and for the vast selection of modular options and power ratings available to meet the requirements of virtually any application. Installed in all major industrial sectors, our drive products continue to set new quality standards globally for meeting today's advanced power transmission challenges.

In our nine global manufacturing centers, we build SEW drive components and modules to exactly the same specifications and tolerances. However, final assembly and custom modifications are performed in our 56 regional assembly plants, located close to our customers

in 40 countries around the world – so here in North America you can rest assured you're getting exactly the same drives, no matter where your equipment is going into operation.

What's more, being in close contact with our customers enables our sales engineers and technical specialists to provide knowledgeable applications and project planning assistance, as well as complete startup and training, at your site. And of course, all SEW-Eurodrive products are backed by our industry-leading 24/7 support program, should you ever require service.

SEW-Eurodrive. Driving the world – with innovative products, systems and support that deliver superior performance for your power transmission application.
